

COMPANY PROFILE

SHAH MAKHDUM GARMENTS LTD

BANGLADESH

ABOUT SHAH MAKHDUM GARMENTS LTD.....

Shah Makhdum Garments Ltd was incorporated as an apparel manufacturer for the Global market in 1984. The organization commenced with 150 Workers and 129 machines at Malibagh, Dhaka, Bangladesh.

Moving from one growth stage to another, the business has bloomed over the years braving various odds and adapting to changes when required. The operation has thus extended to a new location in 2012 at Gazipur ,Bangladesh.

Now Shah Makhdum Garments Ltd is equipped with latest automated modern machineries from world class brands. And it is now, one of the well designed and well equipped manufacturing plant in Bangladesh with skilled work force ,breathing environment and relax working atmosphere.

Shah Makhdum Garments Ltd abides by all the code of Conduct practices of most of the apparel importers of USA & Europe

Cont.....

Cont.....

Also the organization responsibly engages in looking into the welfare of its people, recognizing latent talent, providing training in skills development and ensuring a worker friendly environment.

Shah Makhdum has always been totally committed to customer's needs and satisfaction. It encourages a customer driven strategy which allows better understanding of their requirements and thus providing quality products, promptly and efficiently.

The company has a professional Quality Assurance Department directly answerable only to the Executive Director. Several quality control teams of inspectors and auditors are constantly monitoring the different production sections. All the garments produced are subject to strict quality assurance checks & inspections.

Shah Makhdum Garments Ltd is highly regarded for its quality control management practice.

OUR MOTTO

“Fashion and Quality garments at the best price within a committed time frame”

We don't compromise with any of them. The good prices are ensured due to good sources, efficient production planning and a good Quality Assurance system.

We commit to supply top quality product at the best possible price.

Our Target is mainly to give end customer good quality finished products & keep delivery on time. Therefore, we brought professional Sri Lankan expert to manage our entire factory smoothly. We have recruited the most experience staff and Skilled workers to ensure our commitment of high quality garments to our customers

Factory Front View

Sample & Development Section

Sampling section is set up to meet customers demands on the developments of designs and styles with the strength of experience pattern makers and the Sample makers.

Also sample section ensures the in time approvals of styles and fits as per buyer's requirement. Also its make sure that lines are set for the production with the relevant technical information that are used in the samples.

This section offers salesman sample services to their customers at complete rates.

Cutting Section

Cutting Section involve in marker making to ensure to meet customers requirements and cost line.

Also it performs fabric inspection based on 4 points system prior to the cutting and ensures no defects fabrics are used in the production.

Further , after cutting, all panels are checked and numbered to avoid color shadings, and other fabric defects . Our Cutting QA people put this practice to avoid defects goes to the production line.

Cutting section too strengthen by skilled cutters, Marker makers & Cutting Qa team.

Sewing Section

Presently 5 lines are in operation in the building with 65 machines in each line.

Our sewing lines are capable in handling all types of woven garments with a high quality conscious.

Assembly line system is followed here with a combination of modular system. The team works on few garments at a time instead of bundle system and the operators are continuously motivated to work as a team to achieve the target production.

A strict in line inspection is in place and end of the lines all garments screened one by one to ensure the product's quality standard.

Finishing Section

Finishing Section is equipped with steam irons and vacuum tables. And also it is facilitated with special lighting arrangements for segregation of the shades.

Finishing section is responsible for incorporating the buyer's specified finishes to the stitched garments and packing those garments as per the specified packing details specified by buyer.

Again a Re-final inspection would take place to ensure the product's quality standard , which shall go through a Final inspection .
